

Simple Guide to the Quantum Xrroid Consciousness Interface

What is it?

The Quantum Xrroid Consciousness Interface, or QXCI, is an evoked-potential biofeedback device that measures electrical parameters of the body (primarily voltage, amperage, and resistance) and provides reactivity (probability) scores to over 9,000 natural biological substances at biological speeds (17100th of a second). The program of the QXCI generates a rapid double-blind test, in which neither the clinician nor testee can influence the results. The information provided from the assessment is extremely valuable information targeted at wellness enhancement.

What specific information is given?

The QXCI provides reactivity scores to:

Vitamins, Minerals, Microbes (bacteria, virus, parasite, fungus), Glandular/Organ tissues, Various Toxins, Emotional/Stress Factors, Hormones, Neurotransmitters, and much more.

Why have an assessment by the QXCI?

The QXCI can be used by a properly trained clinician to give very specific suggestions in relation to what nutritional, herbal, and dietary regime is likely to be the best for your body.

Who developed the device?

It is the culmination of over 20 years of work by former NASA scientist William Nelson, Ph.D., M.D. Dr. Nelson's background is in biology, mathematics, quantum physics, statistics, electrical engineering, clinical psychology and, of course, natural and homeopathic medicine. He is one of the few professors of Homeopathy in the world. His interest in natural, bio-energetic medicine started with the Apollo 13 project in 1969, at which time he was only 18 years old.

What about the therapies?

The QXCI has over 50 biofeedback therapies in which it uses specific electrical frequencies to enhance wellness by reducing stress. Specifically, it tests areas of stress and imbalance using EPR (Electrical Physiological Reactivity). Chaotic and potentially unhealthy frequencies are measured and corrected, thereby encouraging the body to heal itself. Very important to note is the fact that the QXCI has a built in mechanism that monitors the testee during the session (it gives and receives information, called a Cybernetic feedback loop). The constant feedback features allow the QXCI to change the settings of amplification and frequencies during any of the therapies to ensure that the needs of the testee are taken into consideration at all times.

Is it safe?

The QXCI has a certificate of International Medical Device Safety. It has surpassed all international safety regulations. It is also registered as safe with the National Institute for Hospital and Medical Engineering of Hungary.

Are there any studies done on the QXCI?

There are hundreds of peer viewed, medical-journal articles published on the QXCI device. Most can be found in the International Journal of the Medical Science of Homeopathy, ISSN 1417 0876.

What is involved in the testing procedure?

The procedure is completely non-invasive, and the results are obtained in a matter of minutes. The client is attached by means of a head harness, ankle straps, and wrist straps to a small digital box connected externally to the serial port of a laptop computer. Most people do not consciously feel any sensations during testing or therapy, but in the relatively rare instances in which some do, the sensation is subtle, pleasant and relaxing.

What kinds of practitioners use the QXCI?

The QXCI is used throughout the world by Medical Doctors, Chiropractors, Naturopaths, Nutritionists, Dentists, and many other health professionals.

QXCI QUANTUM XRROID

CONSCIOUSNESS INTERFACE

QXCI stands for Quantum Xrroid Consciousness interface - a state of the art biofeedback system. During testing, the device resonates with thousands of tissues, organs, nutrients, toxins and allergens for one hundredth of a second each, and records the degree to which your body reacts. This type of rapid testing is known as the Xrroid process.

BioResonance or BioFeedback

Every substance, inert or organic, emits its own electromagnetic energy. The highly sophisticated Quantum QXCI can register the frequencies and then check them against a database. The frequencies are also checked for compatibility with the subject, when testing food allergies, for example.

Method of Operation of the Quantum QXCI

The Quantum QXCI scans the patient's body like a virus-scan on a computer, looking for everything from viruses, deficiencies, weaknesses, allergies, abnormalities and food sensitivities. It reports on the biological reactivity and resonance in your body and indicates needs, dysfunctions and vulnerabilities.

The information provided is fundamentally different from X-rays, blood tests, etc., as it tells us about the energetic state of your body and the direction in which the body is focusing its energy.

Once it has measured vitamin levels, amino acids, nutrients, food substances, minerals, enzymes, natural sugars, toxins, hormone levels, muscle tone, disease, bacteria molds, fungi, viruses and the health and balance of internal organs, it then compares these figures against a "norm". Basically it shows up anything that is affecting the health. For example, if someone has digestive trouble, the Quantum QXCI may show that they had salmonella as a child, which is still causing them problems.

Quantum BioEnergy Balancer

The QXCI is more than just a bio-energy evaluation tool. There are so many programs on the Quantum QXCI, which after measuring the body's frequencies, also feeds back its own frequencies to redress or neutralise destructive wave patterns. In some cases it may add frequency, in others reverse it to either enhance or counteract the body's own resonances

The Quantum QXCI measures the body's resonance/reactance pattern and determines what benefit has occurred in the time period since the last measurement (less than a second earlier). If there has not been an improvement, the input resonance is altered. It maintains each beneficial setting as long as it is helping and changes it as soon as it is no longer useful.

In addition, the Quantum QXCI is more than that. It can also be used to measure mental frequencies and map out a patient's psychic and emotional state, indicating personality traits such as a tendency to worry, which obviously impact on health.

QXCI Technology is Based on Decades of Research

The accuracy and reliability of the QXCI bio-resonance system is based on decades of research conducted in the field of bio-energetic and bio-response medicine (EDS - electro-dermal screening, Voll Meters, Vega, Mora, etc.) Science has shown us that the body is indeed electric; therefore electrical reactivity in the body can be measured via responses to impedance, amperage, voltage, capacitance, inductance and frequencies. The device measures sixteen standard electrical parameters of the body beyond just simple resistance. This makes the QXCI unique. Most standard point and probe devices (Voll Meters, etc.) only measure resistance.

Trivector resonant frequencies (a mathematical calculation of the relationship between voltage, amperage and resistance) of substances are compared to the trivector resonant frequencies of your client. This results in the best energetic medicine analysis possible.

Obtain a response to nearly 7000 compounds in minutes! Rapidly scan for bio-energetic imbalances.

QXCI Eliminates Operator Bias

The computer establishes a cybernetic feedback connection (a handshake) with the patient/client in order to guide the therapy regime. This ensures that the only person in charge of the duration of settings of the therapy is the patient/client themselves. This eliminates the possibility of the therapist unconsciously affecting the therapy. Less sophisticated Electro-dermal Screening devices, costing up to \$12,000.00 require the operator to touch the subject and to apply a metal probe onto certain acupuncture points and then interpret the results. This can often lead to subconscious operator contamination of the readings. This possibility is eliminated with the QXCI.

Constant Feedback

Unlike any other therapy device on the market, the QXCI has a built in mechanism that monitors the subject during the session. This ensures the individuality of each test and therapeutic session.

The handshake and constant feedback features allow the QXCI to change the settings of amplification and frequencies during any of the therapies to ensure that the needs of the subject are taken into consideration at all times. This allows the device to cease therapy automatically as soon as the subjects reactions show that maximum effectiveness has been achieved; thus providing maximum safety.
